SUMMARY

Senior Software Engineer specializing in enterprise fleet management systems, with 5+ years leading legacy-to-modern platform migrations (C# .NET to Java Spring Boot and Vue.js) and driving production stability through root-cause analysis. Proven track record mentoring engineers and coordinating cross-border delivery across Japan, China, and Vietnam teams.

SKILLS

Programming: Java (Primary), JavaScript, React.js, C#, Python, SQL
Framework: Spring Boot, Vue.js, .NET
Database: PostgreSQL, MySQL, SSMS, Cassandra
Tools: Git, Maven, Windows/Linux, ActiveMQ, Apache Guacamole
Languages: Thai (Native), English (TOEIC: 845)

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Jun 2024 - Present

Transtron (Thailand) Co., Ltd.

- Lead design, development, and maintenance of enterprise fleet management systems, translating customer requirements into scalable technical solutions
- Reduced recurring production incidents through root-cause analysis and preventive fixes
- Serve as technical consultant on code reviews, improving code quality and mentoring team members on best practices
- Refactor legacy modules to improve scalability and maintainability
- Manage deployments to internal test and production environments via Apache Guacamole
- Author UI and functional design documentation used by cross-functional teams across 3 countries
- Coordinate with headquarters (Japan) and development teams (China, Vietnam) to align requirements and resolve cross-border issues

Software Engineer — Mar 2021 - May 2024

Transtron (Thailand) Co., Ltd.

- Migrated enterprise fleet management systems from C# (.NET) to Java (Spring Boot) and Vue.js
- Performed root-cause analysis on production incidents, reducing recurring issues at their source
- Built and executed unit and integration test suites, improving release reliability
- Deployed and maintained internal test and production environments through Apache Guacamole
- Authored UI and functional design documentation

Software Developer — Jul 2019 - Feb 2021

Befirst-IT Network Solution Co., Ltd.

- Developed and maintained web-based management systems using HTML/CSS, JavaScript, PHP, and MySQL
- Designed and implemented features aligned with customer requirements
- Provided post-deployment support and system maintenance

TRAINING

On-the-Job Training — Jan 2025 - Mar 2025

Fujitsu Nanjing Software Technology Co., Ltd.

- Led performance optimization of message sending performance improvement
- Reduced redundant database accesses through logic refactoring
- Collaborated on-site with Chinese development team on system optimization initiatives

EDUCATION

Bachelor of Science - Computer Science — 2015 – 2019

King Mongkut's University of Technology North Bangkok

Senior Project: Let's Hue - Web-based order and delivery system and integrated chatbot
